IRON CURTAIN NOISE GATE

Ultra Fast and Efficient Noise Gate with 2-Knob Interface

- Speedy and effective noise gate reduces unwanted noise from your guitar signal
- Easy to use 2-knob interface controls threshold and decay
- Toggle switch lets you choose between muting signal completely or reducing unwanted noise
- True bypass for ultimate signal integrity
- "Built-like-a-tank" metal chassis
- Runs on 9 V battery or PSU-SB DC power supply (not included)
- 3-Year Warranty Program*
- Designed and engineered in Denmark

Has your guitar signal gotten a bit overcrowded due to noisy electrical wiring or Radio Frequency Interference (RFI)? IRON CURTAIN NOISE GATE is the no-nonsense way to banish your sound gremlins with its simple and intuitive 2-knob operation. Thanks to an all-analog design that features only the highest-quality components, and a zero-tolerance policy for unwanted noise – only the purest signal gets past the IRON CURTAIN!

High Quality Analog Circuitry

Stray noise can come from a variety of places: vintage amplifiers; single-coil pickups; light dimmer circuits – plus some venues just have a lot of inherent noise. If your performance calls for everything from sweet and soft passages with barely audible notes to wailing like there’s no tomorrow, IRON CURTAIN NOISE GATE’s all-analog circuit blocks the noise and lets your tone through in all its glory.

IRON CURTAIN NOISE GATE

Ultra Fast and Efficient Noise Gate with 2-Knob Interface

Ease of Use

With only a Threshold and Decay knob to master, IRON CURTAIN NOISE GATE is simpler to operate than most overdrive pedals. The 2-knob layout makes it easy to dial in a superbly-responsive guitar sound, whether you're grinding massive-gain metal, or playing blues on single coil pickups in a building that was handwired by Thomas Edison!

Build Quality

As you might expect, IRON CURTAIN NOISE GATE is made out of iron. This sturdy little box is built to stand up to a full-frontal assault, so a little time on the road is easy. The top-mounted jacks make it ideal for the most compact pedal board, plus the true bypass design respects your tone – even when the pedal is off.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Group factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous Warranty program.
