

Quick Start Guide

994 MULTIPLES

Legendary Analog Dual Multiples
Module for Eurorack

Signal Connections

Connect an input signal to one of the 4-jack sections, then send up to 3 copies of the signal to other devices.

Installation

The necessary screws are included with the module for mounting in a Eurorack case. Connect the power cable before mounting.

Depending on the rack case, there may be a series of fixed holes spaced 2 HP apart along the length of the case, or a track that allows individual threaded plates to slide along the length of the case. The free-moving threaded plates allow precise positioning of the module, but each plate should be positioned in the approximate relation to the mounting holes in your module before attaching the screws.

Hold the module against the Eurorack rails so that each of the mounting holes are aligned with a threaded rail or threaded plate. Attach the screws part way to start, which will allow small adjustments to the positioning while you get them all aligned. After the final position has been established, tighten the screws down.

Specifications

Signal Connections

Type	8 x 3.5 mm TS mono jacks, unbalanced
Arrangement	2 sets of 4 parallel jacks, passive
Compatibility	CV and audio signals

Physical

Dimensions	23 x 20 x 129 mm (0.9 x 0.8 x 5.1")
Rack units	4 HP
Weight	0.05 kg (0.11 lbs)
